

16 Jul 2016

DiGiCo's Stealth Core 2 is a major upgrade to the Stealth Digital Processing™ for its SD series digital mixers. Delivering significantly enhanced processing from the audio core of DiGiCo SD series consoles, it takes the range to a new level in terms of both processing channels and functionality.*

Available as an upgrade option for existing users and shipping as standard on new consoles, Stealth Core 2 has been updated from the ground up, with the application code upgraded to deliver significantly enhanced facilities. This will future-proof SD series consoles and continue to keep DiGiCo users one step ahead of the rest.

Stealth Core 2 delivers many benefits, including:

An updated user experience, including a brand new graphic interface on console screens.

Upgraded FPGA power delivering enhanced processing.

Full Dynamic EQ, DiGiTuBes and MB Dynamics on every channel and buss.

SD series consoles updated with Stealth Core 2 will feature the following channel counts:

- SD11: 48 input channels, 24 output busses (plus Master and 8x8 matrix), 6 Digital FX, 8 Control Groups, 83 Multiband Dynamic options and 83 Dynamic EQs.
- SD11i: 80 input channels, 24 output busses (plus Master and 8x8 matrix), 8 Digital FX, 8 Control Groups, 115 DiGiTuBes, 115 Multiband Dynamic options and 115 Dynamic EQs.
- SD9: 96 input channels, 48 output busses (plus Master and 12x8 matrix), 12 Digital FX, 12 Control Groups, 155 DiGiTuBes, 155 Multiband Dynamic options and 155 Dynamic EQs.
- SD8: 120 input channels, 48 output busses (plus Master and 16x16 matrix), surround sound, 16 Digital FX, 24 Control Groups, 190 DiGiTuBes, 190 Multiband Dynamic options and 190 Dynamic EQs.
- SD10: 132 input channels, 56 output busses (plus Master and 24x24 matrix), surround sound, 24 Digital FX, 24 Control Groups, 218 DiGiTuBes, 218 Multiband Dynamic options, 218 Dynamic EQs.
- SD5: Up to 253 input channels, up to 128 output busses (including Master and 24x24

matrix), surround sound, 48 Digital FX, 36 Control Groups 253 DiGiTuBes, 253
Multiband Dynamic options, 253 Dynamic EQs.

- The SD7 is a FOC upgrade that allows users to have the new Core 2 interface and Graphics

“Delivering the ultimate return on investment for our partners has been our aim since we launched DiGiCo back in 2002,” says DiGiCo MD James Gordon. “The audio environment is even more challenging for them now than it was then and it’s vitally important that we provide our support. We have constantly upgraded our consoles to make sure our products stay ahead of the competition, but Stealth Core 2 opens up a multitude of features that will keep us and their investment there for the foreseeable future.”

* SD7 Quantum 7 Engine upgrade will be available next year.
